EXAMINER

BAUGH, APRIL L

ART UNIT	PAPER NUMBER
2141	

DATE MAILED: 07/31/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No.	Applicant(s)
	09/775,657	CRANDALL, EVAN STEPHEN
	Examiner	Art Unit
	April L Baugh	2141

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) Claim(s) 1-22 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-22 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 05 February 2001 is/are: a) accepted or b) objected to by the Examiner.
 

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on \_\_\_\_\_ is: a) approved b) disapproved by the Examiner.
 

If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

#### Priority under 35 U.S.C. §§ 119 and 120

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
  - a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

#### Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413) Paper No(s). _____
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) <u>4</u> .	6) <input type="checkbox"/> Other: _____

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, 9-17, and 20-22 rejected under 35 U.S.C. 102(e) as being unpatentable by US Pat. No. 6,002,832 to Yoneda.

Regarding claim 1, Yoneda teaches a method for transmitting a performance via a network comprising: receiving performance information including one or more mixing commands via the network (column 2, lines 11-15); composing a performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); and transmitting one or more portions of the performance (column 2, lines 20-22).

Referring to claim 12, Yoneda teaches a performance transmission device, comprising: a receiver that receives performance information including one or more mixing commands via a network (column 2, lines 11-15); a controller that composes a performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); and a transmitter that transmits one or more portions of the performance (column 2, lines 20-22).

Regarding claims 2 and 13, Yoneda teaches the method of claims 1 and 12, wherein the transmitting one or more portions of the performance comprises transmitting one or more

portions of the performance information received via the network (column 2, lines 19-21 and 41-44).

Referring to claims 3 and 14, Yoneda teaches the method of claims 1 and 12, wherein the transmitting one or more portions of performance information comprises transmitting new information not included in the performance information received via the network (column 2, lines 19-21 and 41-44).

Regarding claims 4 and 15, Yoneda teaches the method of claims 1 and 12, wherein the composing the performance comprises: composing a first performance based on the one or more mixing commands (column 2, lines 15-18); separating the first performance into performance components; and modifying one or more of the performance components to create a second performance (column 2, lines 25-44); and wherein the transmitting the one or more portions of the performance comprises transmitting one or more portions of the second performance (column 2, lines 19-21).

Referring to claims 5 and 16, Yoneda teaches the method of claims 4 and 15, wherein the modifying the one or more performance components comprises one or more of deleting a performance component and replacing a performance component (column 2, lines 62-65).

Regarding claims 6 and 17, Yoneda teaches the method of claims 1 and 12, further comprising adding a performance component to the performance prior to transmitting the one or more portions of the received performance information (column 2, lines 19-21 and column 17, lines 9-11).

Referring to claim 9, Yoneda teaches a method for transmitting a performance via a network, comprising: receiving performance information including one or more mixing

commands via the network (column 2, lines 11-15); composing a first performance based on the one or more mixing commands (column 2, lines 15-19); separating the first performance into performance components; and modifying one or more of the performance components to create a second performance (column 2, lines 25-44); and composing a performance by mixing stored information based on the one or more mixing commands (column 8, lines 10-23); and transmitting one or more portions of the second performance (column 2, lines 20-22).

Regarding claim 10, Yoneda teaches a method for transmitting a performance via a network, comprising: receiving performance information including one or more mixing commands via the network (column 2, lines 11-15); composing a performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); adding a performance component to the performance prior to transmitting the one or more portions of the received performance information (column 2, lines 25-44); and transmitting one or more portions of the performance, including the modified one or more performance components (column 2, lines 20-22).

Referring to claim 11, Yoneda teaches a method for transmitting a performance via a network, comprising: receiving performance information including one or more mixing commands via the network (column 2, lines 11-15); composing a performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); buffering the received performance information (column 8, lines 10-23); receiving a request for transmission of the performance; and transmitting the one or more portions of performance in response to the request for transmission of the performance (column 2, lines 20-22).

Regarding claim 20, Yoneda teaches a performance transmission device, comprising: a receiver that receives performance information including one or more mixing commands via a network (column 2, lines 11-15); a controller that composes a first performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); a modification system which, based on user input, separates the first performance into performance components and modifies one or more of the performance components to create a second performance (column 2, lines 25-44); a transmitter that transmits one or more portions of the second performance (column 2, lines 20-22).

Referring to claim 21, Yoneda teaches a performance transmission device, comprising: a receiver that receives performance information including one or more mixing commands via a network (column 2, lines 11-15); a controller that composes a first performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); a modification system which, based on user input, adds a performance component to the performance (column 2, lines 25-44); and a transmitter that transmits one or more portions of the performance, including the performance component added by the modification system (column 2, lines 20-22).

Regarding claim 22, Yoneda teaches a performance transmission device, comprising: a receiver that receives performance information including one or more mixing commands via a network (column 2, lines 11-15); a controller that composes a performance by mixing stored information based on the one or more mixing commands (column 2, lines 15-19); and a memory that buffers the received performance information (column 8, lines 10-24); wherein the controller receives a request for transmission of the performance and causes the transmitter to transmit the

Art Unit: 2141

one or more portions of performance via a transmitter in response to the request for transmission of the performance (column 2, lines 20-22).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 8, 18, and 19 rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 6,002,832 to Yoneda in view of Raz.

Referring to claims 7 and 18, Yoneda teaches the method of claims 1 and 12, further comprising: buffering the received performance information; wherein the transmitting the one or more portions of performance is performed in response to the request for transmission of the performance (column 2, lines 19-21).

Yoneda does not teach and receiving a request. Raz teaches and receiving a request for transmission of the performance (column 1, lines 59-62). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to further modify the apparatus and method for recording and reproducing data of Yoneda by receiving a request because this gives the user more control of the system.

Regarding claims 8 and 19, Yoneda teaches the method of claims 7 and 18, further comprising: wherein the buffering the received performance information is performed in response to the pause request (column 1, lines 50-52 and column 2, lines 14-16).

Yoneda does not teach and receiving a request. Raz teaches receiving a pause request (column 1, lines 59-62). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to further modify the apparatus and method for recording and reproducing data of Yoneda by receiving a request because this gives the user more control of the system.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to April L Baugh whose telephone number is 703-305-5317. The examiner can normally be reached on Monday-Friday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 703-305-4003. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-9149 for regular communications and 703-746-9149 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
